

# Look Alike Centers

# Look Alike Centers

## table of contents

### and explanation

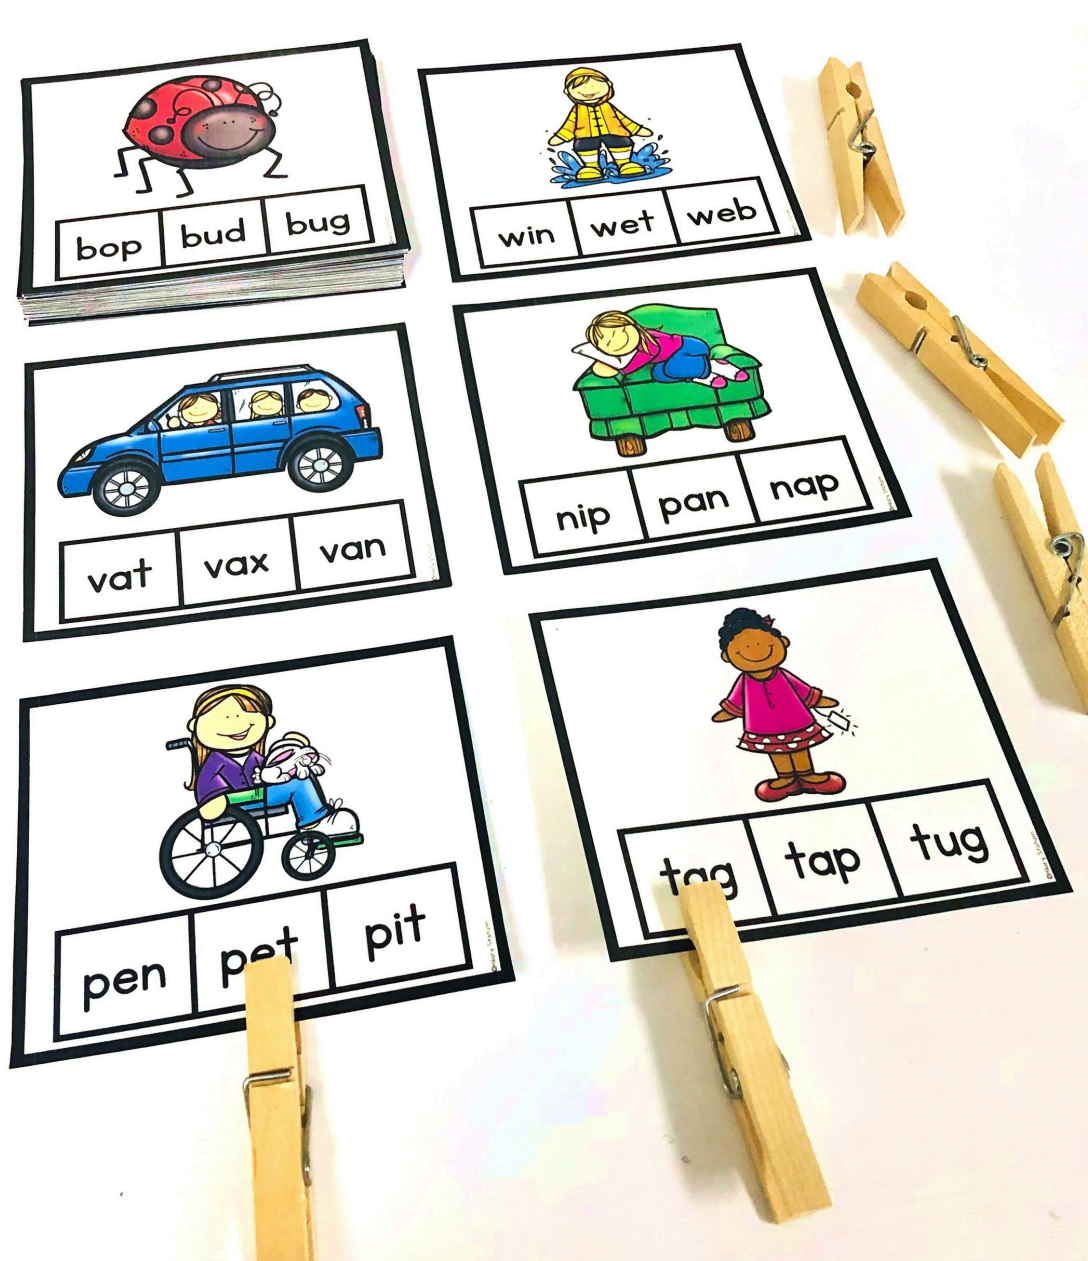

Pages 4-23-Look Alike Mats -I like to pair these with small manipulatives such as mini-erasers or counters. During centers, students are asked to spread the mats out and leave the small objects on the words until I've had time to check for accuracy. This way I can use the mats again and again!

Pages 24-48-Clip cards. Clip cards to pair with clothespins for the perfect independent center! I like to introduce these as we study each vowel sound.

Pages 49-63-Coloring Pages -These are meant to be a quick assessment of student understanding. They enjoy these since they just color in the correct word. Ask them to color the pictures for extra fine motor practice!

# classroom photos

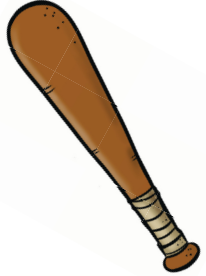

I print these in color on white cardstock to use them again and again.

I like to laminate to make them more durable. Young learners love using clothespins so these "clipcards" add an extra layer of fun for them!

You can also use small manipulatives!
